Why Agile?

Agile is primarily a culture and mind-set change. It initiates mind-shift from command & control management practices to collaborative, team centric environments. Agile is a philosophy that uses organizational models based on people, collaboration and shared values. Agile is an iterative and incremental approach to project management that helps teams deliver value to their customers faster. Agile gives an opportunity to the team to learn with each new iteration. Requirements, plans, and results are evaluated continuously for responding to change and value delivery quickly. Scrum is the most popular and widely used framework practising Agile values.

Why Certified Scrum Product Owner (CSPO) Workshop?

Scrum Product Owners are typically the individuals who are closest to the business side of the project. Product owners are charged by the organization to get the product out, getting customer engagement and satisfaction. They share product vision, maintain & prioritize the product backlog delivers consistent value and ROI. Scrum incorporates the concepts of continuous improvement and minimum viable products to get immediate feedback from consumers, rather than waiting until a project is finished. This CSPO workshop focuses on understanding product vision, product discovery, product requirements prioritization, product ownership, Value driven development, Agile product management and makes you ready for being effective Scrum product owner.

Exam / Certification Details

There is no exam. After completing the 2 days of workshop, we will register you with Scrum Alliance, post which you will receive a confirmation email. You can login and download your CSPO certificate.
