

Management 3.0 (Leadership, Agility and Management)

Workshop Overview :

The Management 3.0 is a modern-day management course that lays down a road map for leading Agile teams in a changing world, and combines the fundamental principles of complexity thinking, Agile management, and Lean product delivery to inspire the managers of tomorrow's world. It also coaches on new leadership styles to contemporary styles of management.

Management 3.0 practitioners feel that in order to make a change in the world, the role of management cannot be left to managers alone but has to be undertaken by all workers at every level. Our experienced professional trainers have a love and passion for management, and deliver compelling workshops that can provide real-world insights into improving organizational management at all levels.
